

Birmingham Nov. 20 1892

My Dear Dr. Gray

I have seen
through Mr. Redfield the
beautiful Brazilian ferns season-
by one of which I had been.

And likewise a "Fribra" with
the app of ill. That most interest-
ing specimen, - as to me at
least - which confirms my own
in certain respects.

Please accept my best
thanks to all.

We have stopped work on
our Reservoir for the winter and
I shall have a little more
time for Botany in which two-
me I am sure.
